

THE SMOKELESS FIRE PIT WITH A TWIST

The Revolve fire pit is an innovative, all-stainless fire pit with a patent-pending inner airfoil design that improves combustion while making the flames revolve. Unlike most fire pits, the Revolve radiates heat to the sides, creating a comfortable environment. Damper doors on each side give you control over the air flow and burn time.

- Makes a beautiful display as the flames spin
- Smokeless technology featuring secondary combustion
- Heat radiated sideways keeps your feet warm
- All-stainless steel construction, patent -pending design
- Available sizes 8", 12", 16", 22", and 27"
- 22" and 27" available in stainless steel and black painted steel
- Available stainless steel base for use on a deck or wooden surface
- Easily prepare food with the optional grill accessory
- Durable and easy to clean

Revolve Fire Pit Accessories

- Elevated stainless fire pit base
- Cooking grill
- Fire poker / ash shovel

IGNITING THE FUTURE OF FIRE

Flame Innovation is leading the development of stoves and fire pits to bring you innovative, American-made products for your heating needs. Our products are proudly designed and hand-welded in Post Falls, Idaho, and are manufactured using American steel.

The Caboose™

Flame Innovation has created a UL-Listed tiny wood stove that will completely heat areas from 200 to 600 square feet. The Caboose is ideal for installation in Tiny Homes, Canal Boats, Cabins, Sheds, RVs, Yurts and more.

The Caboose is a handsome, space-saving stove that can be free-standing, or wall-mounted using the bracket shown above.

This stove burns cord wood up to 14" long, and features efficient burn times of 4 to 6 hours using soft woods, and longer when burning hardwood.

- Burns cordwood up to 14" long, 5" diameter
- Measures 22" wide x 25" tall x 10" deep front to back
- Requires 12" clearance and standard R2 hearth pad when free-standing
- Air-washed glass viewing window provides great heat transfer
- Features an 8x10" cook top
- Outside air combustion feature for use in small spaces
- Utilizes 4" HT UL rated combustion pipe for exhaust
- Weighs only 90 lbs

The Steelhead™

The Steelhead is a versatile, UL-Listed wood stove that can produce between 10K and 23K BTUs - heating spaces up to 1300 square feet. The Steelhead is ideal for Tiny Home and off-grid living. This stove is not approved for residential heating.

The stove features an air-washed Neo-Ceram glass viewing window with a decorative plasma-cut inset of pine trees set into it.

This highly efficient non-catalytic stove burns cord wood up to 18" long, and features a secondary burn system, providing burn times of 8 hours using soft woods, with no need for fans or electricity.

The Steelhead stove can optionally include a welded stainless steel water tank, allowing it to heat up to 10 gallons of water.

- Measures 14 1/2" wide x 24" deep x 25" tall (30" at collar) and stands 38" tall when mounted on its 13" legs
- Brick-lined firebox is 9" wide x 18" deep x 12" tall
- Air-washed Neo-Ceram glass viewing window provides great heat transfer
- Optional stainless steel tanks heat up to 10 gallons of water
- Fresh air intake adapter and secondary burn system improves burn efficiency
- No circulation fans, and no electricity required
- Uses standard 6" HT UL rated stove pipe
- Weighs approximately 180 lbs.

The Rocket Stove™

The Rocket Stove collapses and packs flat - making it a perfect camp and hiking stove. Since these stoves pack up easily, they're great for outdoor cooking at campsites, parks, off-grid living, and much more. It's great for prepping since it stores flat.

This stove works with any pan that fits the cooktop and is suitable for open flame, including Dutch ovens, woks, and cast iron pans.

- RS 15 is 11x5x15 and 11x11 cook top, 13.5lbs
- RS 18 is 12.5x6x18 and 13x13 cook top, 19lbs

Fire Pits and Chimineas

Our selection of fire pits and chimineas are just what your back yard needs this summer! Create a beautiful outdoor aesthetic for your guests to gather around.
