

PACKAGE CONTENTS

PART	DESCRIPTION
A	Table
B	Mounting Sleeve
C	Upper Bracket
D	Lower Bracket

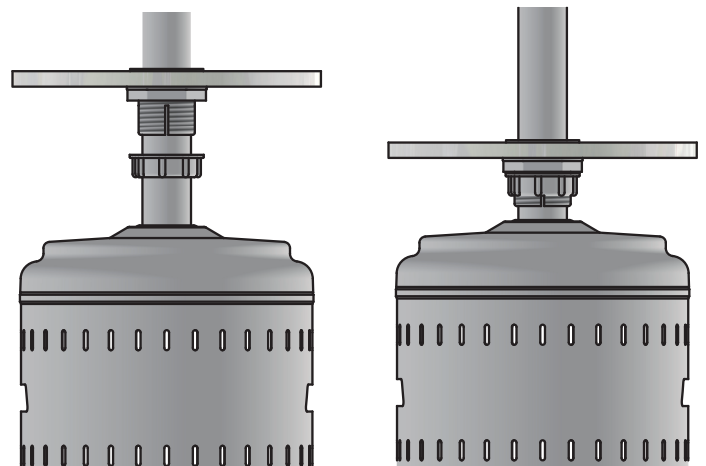

ASSEMBLY

- 1 Insert **Mounting Sleeve B** into the hole at the center of the **Table A**. Screw the **Upper Bracket C** onto the threads of the **Sleeve** as shown to secure the **Sleeve** in the hole.

- 2 *NOTE: if installing the table on an already-assembled patio heater, you will need to remove the head and gas hose from the top of the pole to proceed.*

Slide the **Lower Bracket D** down onto the heater pole, followed by the assembled **Table A**. Position the **Table** at the desired height. Thread the **Lower Bracket** onto the bottom of the **Mounting Sleeve B** and tighten securely to fix the **Table** in place. Check that the table is secure by applying gentle, even, downward pressure. Tighten if needed.

Re-install the heater gas hose and head according to the unit's assembly instructions and perform a leak check prior to use.
