Oak Beam

## NON-COMBUSTIBLE

Patented Burncrete™ casting™ material passed the ASTM E136 standard for non-combustibility. This allows for mantles to be installed closer to fireplace openings.

## MANTEL KITS

Our mantels are kits includes easy to follow installation instructions, a heavy-duty mounting bracket, fasteners, hole filler and touch-up paint.

## CRAFTSMANSHIP

Each Lexington Hearth mantel is meticulously hand-painted, by incredible coloring artists, to capture the natural weathered character and color nuances acquired with exposure to the elements over time. The end result is an authentic recreation of an antique mantel suitable for fireplace designs requiring non-combustible materials.

## COLORS

**Weathered Grey:** The natural grey color that untreated wood develops when exposed to the elements.

**Pale Honey:** The golden color of aged whiskey after a few years in the barrel.

**Maduro:** The dark brown wrapper of a good cigar.

## HAND MADE IN THE USA

Lexington Kentucky manufactures award winning hearth products since 1992. Our mantels are molded directly from antique timbers that are salvaged from

- historic barns, farms, homes and cabins across the Bluegrass region.

## BENEFITS OF NON-COMBUSTIBLE MANTELS

- Air-gap construction reduces weight and minimizes heat transfer to the top of the mantel, protecting TV and other decorations. Allowing TV placement at a lower, more comfortable angle. Each hand painted mantel is coated with non-toxic paint and casting materials that will not release unpleasant aromas when heated.
