

BOULEVARD 48-INCH & 60-INCH
Linear Direct-Vent Fireplaces

Boulevard

Boulevard 60-inch Direct-Vent Linear Fireplace with Ridgeback Corrugated Liner, and Logs, Rocks and Coils (shown in tile custom surround)

BIG, BOLD, BOULEVARD.

Boulevard Linear Fireplaces provide the perfect scale for today's large spaces – from a spacious family room to a hotel lobby to an upscale restaurant.

Tailor the Boulevard fireplace to suit your taste, starting with an elegant porcelain black liner that goes well with any décor. Or opt for an industrial chic look with the Ridgeback liner – a one-piece corrugated metal liner finished in distressed bronze.

The fully recessed burner fills the fireplace with lively flames– up to 38,000 Btu (Nat)/34,000 Btu (LP) for the DVLL48, and up to 46,000 Btu (Nat)/42,500 Btu (LP) for the DVLL60. Acres of crushed glass cover the fireplace floor (available in a variety of colors), while the halogen lighting lets you set the perfect mood – whether the fireplace is burning or not. Choose our Copper Reflective or Bronze Reflective crushed glass – or Clear Frost. These translucent shades of crushed glass allow the under-floor white light system to shine through, but you can accent with other glass colors including our drops and droplets.

The available Rustic Log Set includes a unique assortment of ceramic fiber logs and stones, plus coiled slivers of stainless steel that react to the light and flames to bring your fireplace to life.

Modern Technology – Intuitive Control

The Boulevard fireplace ships with multifunction thermostat remote control that operates the variable burner, dimmer lighting (optional on DVLL48), and optional blower. The bright backlit LCD screen uses simple graphics to guide you through set-up and operation.

Every Boulevard includes an electronic intermittent ignition system that eliminates the standing pilot to help you save energy and money. The system includes battery back-up located in a wall box for manual or remote operation. The remote allows you to switch to a standing pilot mode to continue heating your room during power outages. Ceramic glass aids in heat transfer.

Add tile right up to the rectangular opening to create a stunningly beautiful, amazingly efficient clean-face fireplace. The optional trim kit finishes the opening and adjusts for different depths of tile or stone.

Installation Requirements

- Includes non-combustible board for installation above the fireplace. Additional non-combustible materials are required to surround the fireplace opening – such as tile, stone, or non-combustible board and finishes.
- Liner (matte black liner included on DVLL48)
- Crushed Glass (see manual for requirements)

Options

- Fronts – available in ¾ -inch trim in Matte Black or Hammered Pewter (hides the tile's cut edges); 3-inch Forged Iron; and 2-inch Brushed Nickel
- Dual Blower (200 cfm total)
- Dimmer Lighting is optional for DVLL48; standard on DVLL60

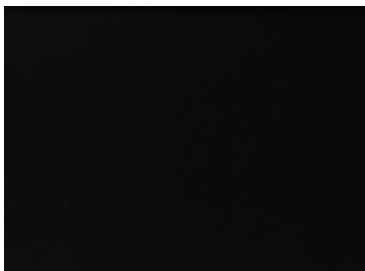

Boulevard 60-inch Direct-Vent Linear Fireplace with Black Porcelain Liner, Pewter Trim Kit,* and Clear Frost Crushed Glass (shown in wood-grain porcelain tile custom surround)
