INSTALLATION ACCESSORIES

*Accessories for Wood Burning & Direct−Vent Gas Fireplaces*

Double Wall Pipe

FMI Products wood burning pipe features a "double wall" or an inner and outer pipe. The outer pipe, made of galvanized steel, provides cooling air necessary to maintain safe chimney temperatures, while the inner pipe, made of stainless steel, emits the gases out of the fireplace.

FMI Products Double Wall Pipe is available in a variety of lengths from 12" to 48", two diameters 8" x 12 3/8" and 12" x 15 3/8", and two types Standard & High Temperature.

What's more, standard double wall pipe can withstand temperatures up to 1700 degrees, high temperature double wall pipe up to 2100 degrees.

Best of all, FMI Products patented Snap-Lock design provides easy assembly for the qualified installer.

Double Wall Pipe

FMI Products direct-vent pipe features a "double wall" or an inner and outer pipe. The outer pipe, made of galvanized steel, allows outside air to enter into the fireplace, while the inner pipe, made of stainless steel, emits the gases out of the fireplace.

FMI Products Double Wall Pipe is available in a variety of lengths from 6" to 48". In addition, two diameters 41/4" x 71/4" **(referred to as 4"x7" in this literature)** and 5"x8" pipe are available depending on the fireplace being installed.

Best of all, FMI Products patented Twist-Lock design provides easy assembly for the qualified installer.
