

## iFlame IF-10 App Setup Guide

Before we get started make sure you have ready:

**Apple iOS9** - iPhone 5/5c/6/6+/6s/6s+/7/7+/10X or iPad Mini/iPad 2nd Gen iPad Pro and above

**Android 4.4** - Android enabled devices including Samsung etc with Bluetooth 4.0

An i-Flame IF-10 Smart Remote Control

**Please ensure your iFlame Remote Control has batteries inserted before you begin.**

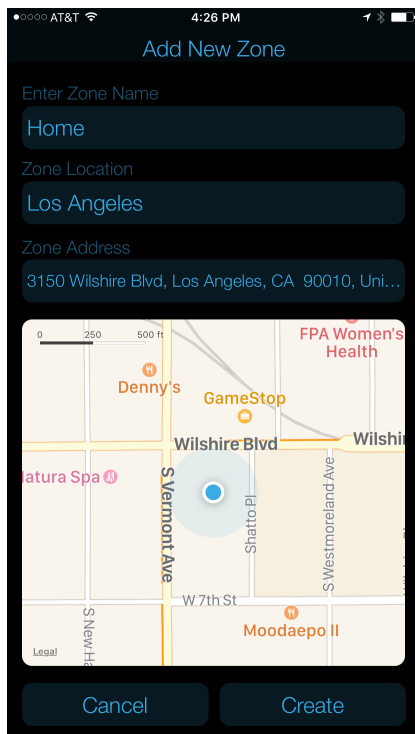

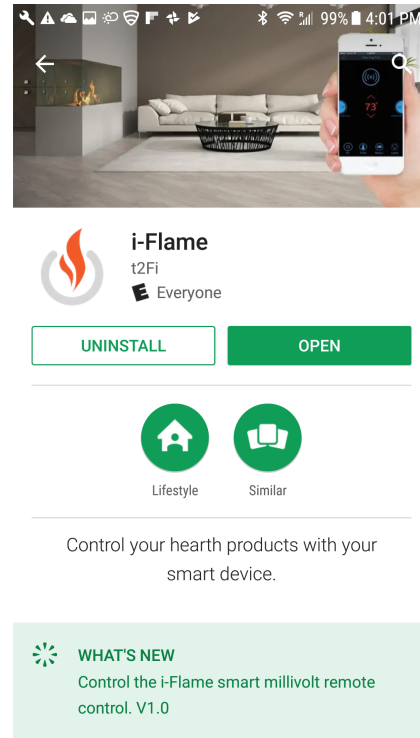

## iFlame IF-10 Instructions V1.4

Download the iFlame app, check and activate your Bluetooth on your device.

### Apple App Store: iFlame

### Google Play Store: iFlame

Creating an account allows your devices to be smart and more energy efficient.

If you have a Facebook or Google+ account etc, you can use your current login details to register.

You will receive an email once your registration process is complete.

## CREATING A ZONE

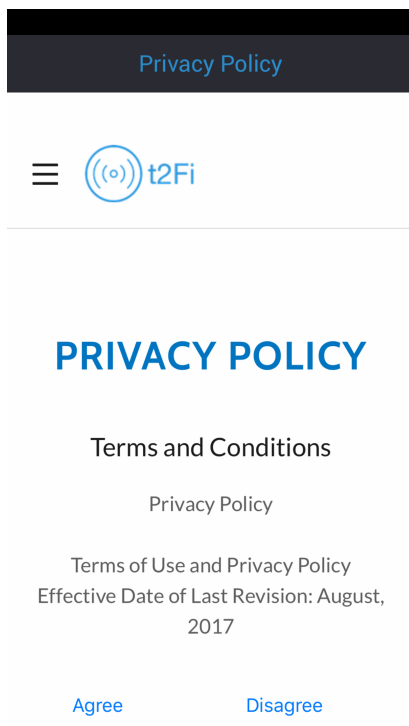

iFlame will now locate and create a zone for you.

Zones are areas or locations that your iFlame is located.

For example, if you have only one Fireplace or Outdoor FirePit you could name your zone 'Home'.

If you have multiple devices then you can allocate different zones for different devices.

Enter your zone name and then press 'Add Zone' to continue.

To continue using the app you will need to agree to the privacy policy.

Please read and 'Agree' or 'Disagree' to continue.

If you 'Disagree' then you will be directed to the Zone screen.

The iFlame app has now created your zone.

You can create as many zones as you like to manage and control your devices.

To add another Zone just press the + icon on the top right hand side of the screen.

The “i” icon is the privacy policy section that you can review.

Zones can be edited or deleted.

You can edit a zone name by swiping to the left of the tile.

Alternatively you can delete a zone.

This screen shot shows you multiple zones that have been created.

Click on the zone that you would like to add your device too.

Please note:

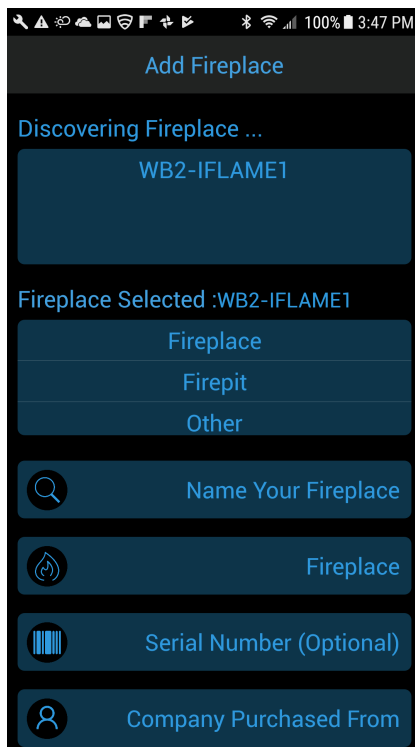

You can add your device in multiple zones.

You now have arrived to your device screen.

In this screen you can add multiple devices.

Click on the + icon to add a device.

The iFlame app is now discovering your iF-10 Remote.

The iFlame IF-10 remote will have a unique serial number.

Scroll to your serial number until it is highlighted.

Select your type of device you have.

Name your device.

Input your serial number.

Input the company you purchased from and then press 'Connect'.

In this screen shot example, there are multiple devices added.

Click on the device you want to control.

Please note:

Make sure your iFlame IF-10 remote is in range of your smart device.

You will see a connecting icon if the app can not find your iFlame Remote.

You can delete devices and re organise them in other zones.

Swipe to the left to delete a device.

Please Note:

You can add the device again if you delete it.

Click on the + icon to add a new or existing device.

Once you click on the device you want to control, you will be able to control it from your smart device.

In this screen, you can manage settings of your device.

View current outdoor temperature etc.
