SunStar is the choice for comfort. Turn down your central thermostat and turn up the heat in the room of your choice with a SunStar vent-free gas space heater. It's affordable, reliable and virtually 100% efficient. And it even works during power outages.

The SunStar SC10 heater features attractive modern styling with up-to-date safety features like flame-failure protection and an oxygen detection safety-pilot or ODS. And, each model is CSA design-certified to the current national safety standards. Turn up your heat and turn down your costs.

SunStar heaters are priced affordably and offer a great value for your home, office or other hard-to-heat areas. SunStar infrared models produce a radiant form of heat that instantly heats people and objects like the sun. So, choose SunStar and choose value.

**For Your Safety**

Installation must be done by a qualified service person. This installation must conform to state and local codes. In the absence of local codes, the installation must conform to the latest edition of NFPA54/ANSI Z223. See your dealer for additional information and thoroughly read the Owner's Manual before installing and operating this heater.
